NOTE, *That in a Bissextile or Leap-year, the number of Sundays after Epiphany will be the same as if Easter Day had fallen one Day later than it really does. And, for the same reason, one Day must, in every Leap-year, be added to the Day of the Month given by the Table for Septuagesima Sunday, and for Ash Wednesday: unless the Table gives some day in the Month of March for it; for in that case, the Day given by the Table is the right Day.*
